Abstract

Teamder is a web app made to help individuals find team mates for their assignments, projects and various other endeavours.

It requires you to sign up using your Email ID and create a profile. Based on your requirements, it presents user profiles of other Teamder users along with useful information such as their resume, ratings, Github and LinkedIn account links etc.

You can left-swipe to reject profiles, or right-swipe to send a “team request” to them. If they accept your team request, you are officially teammates, and can begin working on your project!

Technologies Used

FRONT-END

- "antd": "^4.4.2",
- "axios": "^0.19.2",
- "lodash": "^4.17.20",
- "materialize-css": "^1.0.0",
- "react": "^16.13.1",
- "react-animated-text": "^0.1.4",
- "react-dnd": "^11.1.3",
- "react-dnd-html5-backend": "^11.1.3",
- "react-dom": "^16.13.1",
- "react-icons": "^3.11.0",
- "react-redux": "^7.2.0",
- "react-router-dom": "^5.2.0",
- "react-tag-autocomplete": "^6.1.0",
- "react-tinder-card": "^1.3.1",
- "redux": "^4.0.5",
- "redux-thunk": "^2.3.0",
- "styled-components": "^5.1.1",
- "swiper": "^6.1.1"

Technologies Used

BACK-END

- "body-parser": "^1.19.0",
- "config": "^3.3.1",
- "cors": "^2.8.5",
- "express": "^4.17.1",
- "jsonwebtoken": "^8.5.1",
- "lodash": "^4.17.19",
- "mongoose": "^5.9.21",
- "passport": "^0.4.1",
- "passport-jwt": "^4.0.0",
- "passport-local": "^1.0.0",
- "passport-local-mongoose": "^6.0.1"

Member Contributions

- Nihal - Front-end and Error handling
- Murali - Back-end Routing and Authentication
- Vinay - Design and Back-end Database Management
